

NLP Lab: Autogen

Progress Update 24.05.24

What was done

Demos are deployed at <http://130.162.48.238:8080/>

Conducted experiments:

- Math: 120 Level-5 Problems (difficulty level from 1 (easy) to 5 (hard))

Streamlit demos:

- Function Calls (Webbrowser)
- Chess using functions

OpenReview comments summary

Survey paper summary

Review main takeaways

1. Lack of ablation studies and comparison: to CAMEL and LangChain
2. Cost issue not mentioned: other LLMs (try with Claude or open-sourced ones?)
3. Results not convincing and lack of explanation: differ by repeating the experiments

Survey paper takeaways

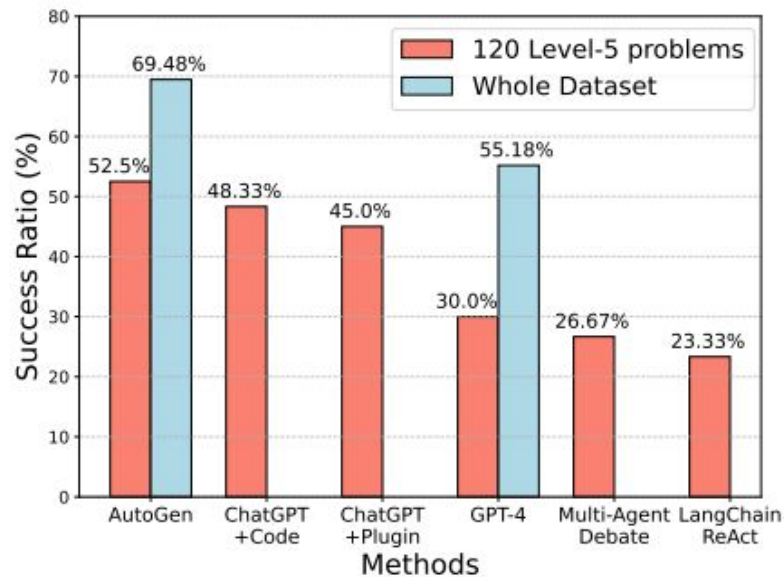

1. A survey on large language model based autonomous agents
 - Choose more benchmarks for evaluation
2. The Rise and Potential of Large Language Model Based Agents: A Survey
 - How to build an overarching structure by combining the SOTA

Next steps

- perform Online Decision Making for Browser interactions experiment
- Search for additional experiments
 - [Work in progress] PDFTriage

Appendix: Math

Original: (Autogen w/ GPT-4)

Ours: (Autogen w/ Gemini 1.5 Pro)
